Problems Encountered:

A challenge encountered is identifying placement in a timely manner for youth who are wards of the state due to exhaustion of alternate familial placement and limited foster care placement. Once a youth exits from shelter services, one of the vital parts in maintaining reunification is to sign up for aftercare services to help reduce the recidivism rate. The youth and parent are always encouraged to sign up for aftercare services to help with the transition back home easier when problems arise. The youth and parent are always given a transitional plan to follow in the event they opt not to seek aftercare services. Further, youth and parents who attended Sanctuary's support groups observed frequent changes with group facilitators. However, before this issue was resolved before the quarter ended. Sanctuary's support groups now have assigned and stable group facilitators running the group.

Lastly, parent involvement in programs (groups and supportive counseling) is limited; parents do not participate in all the services we recommend despite agreeing to participate and access other services upon intake of client.

Future Plans:

The Case Management and Counseling Section have developed corrective action plans to address several deficiency areas such as improving data collections, monitoring of case management activities and case updates. This improvement is making significant progress on a daily basis. Sanctuary continues to partner with agencies such as Child Protective Services by a holding monthly meeting to discuss ways to better serve clientele.
